ABSTRACT

Summary statistics for fall 1980 application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities are presented. The number and percent of increase of applicants are presented for 1973 through 1980 for regular applicants and year five applicants (those who were registered during the 1979-80 academic year as full-time students in year five of an Ontario secondary school). Data are also presented on application and registration ratios, and active applications and registered applicants by specific university and category (year five, regular, and total). Each applicant indicated up to three choices of universities and programs and rated the order of preference for their choices. For each university, the percentage of applicants and registrants that selected it as first, second, and third choice is indicated. The number and percentage of active applications and registered applicants by academic discipline are indicated, along with the percentage of active applications by choice preference. Information is also presented on the previous status or placement of applicants, the geographic origin of active applicants for each university, the number and percentage of year five and regular applicants and registered applicants by age and sex, the number and percentage of applicants by country of citizenship and immigration status, and applicants and registered applicants by academic discipline and sex. This report presents summary statistics on application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities. This is the eighth in a series of annual reports which commenced with admissions in the fall of 1973.

To facilitate timely release of these statistics, no commentary has been included in the report.

* * * * *

This report was prepared by the Research Division of the Council of Ontario Universities and by the Ontario Universities' Application Centre. Requests for further information should be directed to L. C. Payton, Research Division, Council of Ontario Universities.

Introduction

This report presents application and registration data for the fall of 1980. The presentation of the data is identical to that used in the last year's report. Users are cautioned to read the limitations section of this report to be aware of any factors which might affect the comparability of data in this report, both to earlier reports in this series and to other reports which present registration statistics.

Definitions

For the purpose of this report, the definitions used by the Ontario Universities' Application Centre have been employed.

Year 5 applicants refer to those applicants who were registered during the 1979-80 academic year as full-time students in Year 5 of an Ontario secondary school. All other applicants were defined to be Regular applicants.

Each applicant was allowed to indicate up to three choices of universities and programmes. Each choice was considered to be a distinct application, even though the applicant submitted only one application form. Applicants also indicated their order of preference for their choices.

Throughout the admission cycle, applicants were permitted to amend their choices by dropping a choice and adding a different choice. Deleted choices are referred to as inactive choices or applications while current choices (up to the maximum of three) are called active choices. All of the tables in this report exclude inactive choices.

The Application Centre was responsible for processing all applications for first-year full-time applicants who were not previously registered at an Ontario university. When these applicants subsequently registered at an university, they were designated as

registered applicants. If a student had been previously registered (i.e. repeater or internal transfer between programmes) at that institution, his application was not processed by the Centre. Data on all students registered in first-year programmes on a full-time basis were provided to the Centre by the universities via the Statistics Canada/MCU USIS/UAR system. Included in these figures were those students who had applied for advanced standing above first year but had subsequently registered in first year. Where universities did not identify the classification of some of their registrants, these registrants were recorded as unidentified registrants.

Statistics presented in this report deal only with applicants processed by the Application Centre who are applying for fall entry into full-time study in first year of post-Year 5 programmes. In addition to the exclusions listed in the previous paragraph, applicants seeking admission to preliminary year programmes or diploma programmes which do not require Year 5 for entry have been excluded. Table 15 presents a reconciliation of the various categories of registrants in first year.

General Limitations

As previously stated, the Application Centre received data on registrations indirectly from the universities as part of their annual submission of USIS/UAR enrolment data to Statistics Canada and MCU. Prior to 1979, the universities submitted data on registrations directly to the Centre. Data on registrations are particularly sensitive to the count date employed. In 1973, 1974 and 1975 the universities counted their registrants in late September for submission to the Application Centre in early October. Statistics submitted to MCU and Statistics Canada employed a December 1 count date. Commencing in 1976, all registration statistics submitted to OUAC, MCU and Statistics Canada were based on a November 1 count date. However, the statistics reported may not agree because of differences in the definitions of full-time employed for the different submissions.

In its operations the Application Centre employs a unique set of programme categories; there may not be a direct correspondence between these categories and the programme categories used by MCU and Statistics Canada. Furthermore, there may be instances where a student is reported in one programme to the Application Centre and reported in a different programme to either M U or Statistics Canada. In addition, statistics showing enrolment in "First Year" from MCU and Statistics Canada may include programmes (e.g., law, medicine etc.) which are not included in first year as defined by the Application Centre.

Applicants were permitted up to three choices of universities and programmes on the application form. The one exception to this was in 1973 when regular applicants were required to submit a separate application form for each choice of programme and university, up to the maximum of three choices.
